PROJECTS

Project Name: Parlay Owl | **Link to GitHub:**

<https://github.com/BMArsenault/ParlayOwl/tree/main>

| **Link to Deployed Project:** <https://calm-brook-70069.herokuapp.com/>

Project to create an app where you could find the best sports bets and also find a sports bar near you to watch the game on the same day.

Responsible for the front end to create a dropdown list for the sports games available with the sports api. Also helped display the sports games on the front page.

Tech: GraphQL, React, Express js, Nodejs / HTML, CSS, Javascript, NoSQL

Project Name: My Tech Blog | **Link to GitHub:**

<https://github.com/1Clide1/Cool-Tech-Blog> | **Link to**

Deployed Project: <https://my-cool-tech-blog.herokuapp.com/>

This is a blog focused on tech topics that I have made where users can create blog content and comment on other's blog content.

Responsible for creating the backend and frontend of the website that way it is functional.

Tech: Express js, Bcrypt, Connect-session-sequalize, Dotenv, Express-session, MySQL2, Sequelize, Handlebars js/ HTML, CSS, Javascript, MySQL

Project Name: Work Day Scheduler | **Link to GitHub:**

[https://github.com/1Clide1/My-Daily-Planner-](https://github.com/1Clide1/My-Daily-Planner-Website-App)

Website-App | **Link to Deployed Project:**

<https://1clide1.github.io/My-Daily-Planner-Website-App/>

Project focused on creating an app where users can plan out their day and see what activities have passed, are active, and what is upcoming.

Responsible for creating the front end for the website to make sure users can save their activities on local storage and use moment js to help track activities to see whether they are past, present, and upcoming.

Tech: Google Fonts, Bootstrap, Font Awesome, Moment js/ HTML, CSS, Javascript
